PROFILE

AI & Data Science student and builder focused on web products, AI assistants, machine learning, and hardware-based projects. Founder of Hirevoy, with hands-on experience taking ideas from problem definition to prototype and deployment.

SKILLS

Python

C++

Web Development

Machine Learning

Embedded Systems

IoT

AI / LLMs

Communication

Microsoft Office

Computer Repair

ACHIEVEMENTS

- Runner-up, TECH Fest 2024 (THARAG), IHRD.
- Winner, School Expo 2024, KMEA College.

VOLUNTEER

Kerala Startup Mission

Volunteer | 2026

Supported startup and innovation activities through event assistance, coordination, and community engagement.

EDUCATION

Muthoot Institute of Technology & Science

B.Tech — Artificial Intelligence & Data Science

2026 – 2030 | Kochi, Kerala

Model Technical School IHRD

Higher Secondary / 12th Pass

2025 | English Medium

EXPERIENCE

Community Admin

Discord Community Staff | Feb 2023 – Jan 2024

- Managed community operations, member communication, moderation, and day-to-day support.

PROJECTS

Hirevoy — FOUNDER PROJECT

A startup direction around making hiring journeys easier to understand, present, and evaluate for people building real things.

Stack: Product Strategy • Web Platform Design • Roadmapping • User Journeys • Founder Research

- Founder-led product exploration focused on clearer hiring journeys and evaluation.

Sign Language Gloves — HARDWARE + AI

An AI-powered smart glove that recognizes sign language using sensors and machine learning to improve communication for hearing and speech impaired users.

Stack: Arduino • Python • Machine Learning • Embedded Systems • IoT

- Challenge: mapping gesture sensor input into reliable sign recognition.

Project Yukino — AI ASSISTANT

A desktop AI assistant built for voice interaction, automation, and local AI capabilities using modern AI tooling.

Stack: Python • Whisper • LLMs • TTS • Automation

- Challenge: combining reliable voice recognition with local AI flows.
